

Telnyx Omnichannel API: Introducing RCS Business Messaging

RCS combines the rich feature set of an app with the wide reachability of texting.

Maximum Deliverability

A robust API with built-in features to ensure the highest message deliverability.

Carrier grade quality

Traffic is carried across our private network to minimize hops on the public internet.

Multi-cloud & multi-site

Redundant infrastructure lets you send messages with confidence.

Boost engagement and open rates across industries.

Ticketing

Send QR codes, itineraries and suggest replies to confirm or change tickets.

Last Mile Delivery

Send location between drivers and customers to coordinate package deliveries.

Retail and eCommerce

Rich card carousels display product suggestions based on customer profile.

Customer Service

Resolve issues quicker by processing refunds or returns in message.

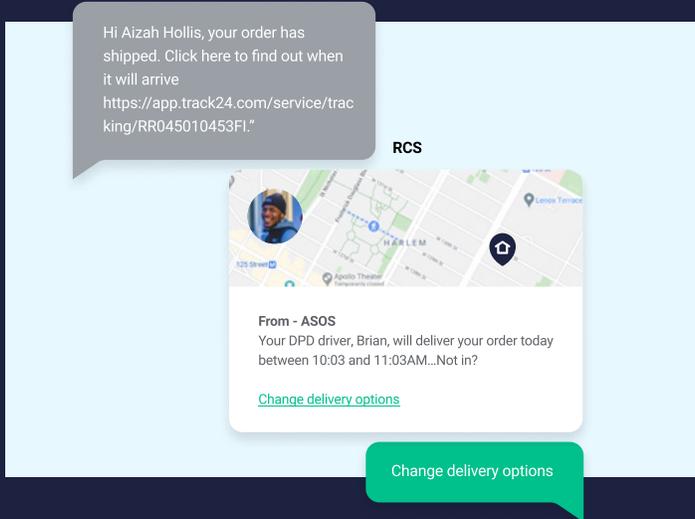

Online Banking

Go paperless with digital bills and invoice notifications.

Loyalty programs

Run effective loyalty campaigns with engaging rich media content.

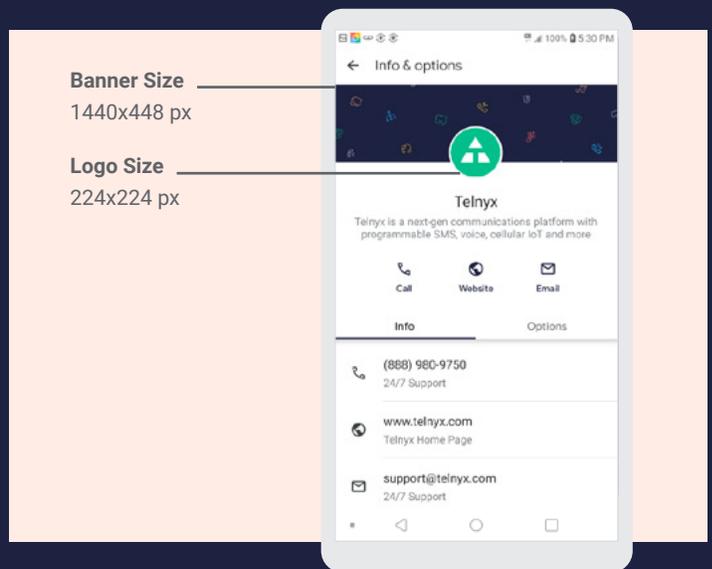

RCS features to boost engagement.

- ✓ **High Resolution Media**
 RCS supports gifs, videos, QR codes, rich card carousels and link previews in messages.
- ✓ **Easy App Integration**
 Link messages to calendars, maps, and embed data like phone numbers, event details or digital wallet.
- ✓ **Suggested replies**
 Customize suggested replies, actions, and follow ups to power contextual communications.

Easy three-step setup.

- ✓ **Step 1**
 Provide a logo, display name and description for your branded agent.
- ✓ **Step 2**
 Complete brand registration verification.
- ✓ **Step 3**
 Test your agent, and launch campaign.
